Seeking a Co-Founder/Partner to Build the Next-Generation SAAS Product

Description

Digital Covet, a forward-thinking Marketing technology Solution company based in Mumbai, India, is on the hunt for a passionate and technically skilled co-founder/partner. Our mission is to revolutionize business operations by developing an innovative, scalable SAAS product that spans cutting-edge web applications, robust software solutions, and dynamic mobile applications. We are looking for a collaborator with the drive to shape a disruptive product that will set new benchmarks in the industry.

About Digital Covet:

At Digital Covet, we believe in merging creativity with technology to deliver superior digital experiences. Our vision is to bring world-class technology solutions from India to a global market. With a strong foundation in innovation, we are ready to build a product that redefines industry standards.

Who We're Looking For

We are searching for a partner who brings:

- A strong background in full-stack development and system architecture.
- Proven experience in building scalable, secure, and high-performance applications.
- A strategic mindset with the ability to innovate and drive the product from concept to market.
- Passion for working in a collaborative startup environment where every idea counts.

Required Technology Expertise

Frontend Development

- **Languages/Frameworks:** HTML5, CSS3, JavaScript
- **Libraries/Frameworks:** React, Angular, or Vue.js
